In this Issue:

1. Welcome

Welcome to the first edition of MORC Creations monthly newsletter.

MORC Creations sees this newsletter as a great new way to communicate with our dedicated followers.

This newsletter will be released on the 2nd Monday of each month and will not only cover what has been happing at MORC Creations in the last month but will also cover upcoming activities at MORC Creations such as product releases, special events and white paper or user free product manual releases.

2. Who are MORC Creations?

MORC Creations originally started as a consulting company in the year 2000 and worked primarily in Project Management, Business Analysis and Programming.

In late 2010 MORC Creations developed an early version of the Graduate Research Information Tracking Software (GRITS for short), then written in a programming language called Delphi. This application was designed to track and manage the basic aspects of research projects.

In 2014 MORC Creations rewrote the GRITS application using Microsoft's Visual Studio, C# and the Telerik component set. Version 1 of GRITS was publicly released as in late 2014 through the MORC Creations website as **My Research Tracker**.

The development of MORC Creations second software package, My Novel Writer, came in late 2015 and was designed for the planning and management of different types of novels and books. Version 1 of **My Novel Writer** was released in mid-2016, again through the MORC Creations website.

In early 2018 the first prototype of the **Universe Builder** application was created more as a proof-of-concept application than a primary application. A production version of the Universe Builder application started development in late 2018 and the application was released in 2019.

In early 2019 Version 1 of the **My Collections** application was created. This application was specifically developed with collectors of all kinds in mind. Being fully user configurable the My Collections application allows collectors to store both images and properties about their collection items. Th My Collections application was released in mid-2019, again through the MORC Creations website.

During 2020 MORC Creations new My Slot Cars application was developed. My Slot Cars was designed specifically for collectors of slot cars and slot car accessories, be it Scalextric, Carrera, AFX or any other type of slot car. This application allows for the storage and management of extensive information about slot cars and slot car accessories, including being able to store up to 20 photographs of any item, along with the ability to create multiple slot car and accessory templates. The My Slot Car application also allows for the entry of multiple slot car configurations may be used at different races along with the details of those races and their race results. This product also has also a built in My Track designer. This product was release in March this year.

Also developed in late 2020 and due for release at the end of March 2020 is the My Task Tracker application. This application allows you to create a manage extensive task lists using multiple customisable task templates. This product will be released free of charge to all everybody through the MORC Creations website.

The latest product due for release by MORC Creations is My Puppy. The My Puppy application is designed for dog lovers and tracks and stores a wide range of information about our beloved friends. Additional functionality included in the My Puppy application includes the ability to graph data in various ways. My Puppy application is due for release toward the end of April.
